Monday 1 October 2018

Dear Aarti,

Thank you for your letter inquiring about Domino's policies and processes to improve antibiotic stewardship dated 15 August 2018.

As you note, in July 2017 we published our first Animal Welfare Policy relating to our supply chain base in the UK and Republic of Ireland, setting out the standards we expect of our suppliers and the processes we have in place for ensuring compliance. The policy – which we have since updated – specifically addresses the issue of antibiotics and is available on our website [here](#).

During 2018, animal welfare has also been incorporated into the Domino's Supplier Code of Practice and we continue to take steps to improve standards, agreeing specific targets and timelines for enhancements with suppliers. We remain committed to providing transparent information to our stakeholders and by 2020, we will publicly report against key animal welfare performance targets. You can read more on both of these areas in our policy online.

We are pleased to have established dialogue with FAIRR over the past year which has been helpful in informing our continued efforts on this issue and in keeping our Animal Welfare Policy under regular review. We hope the information provided in this letter is useful for your next update report.

Yours sincerely,

Nina Arnott  
Head of Communications
